August 30, 2016

Dear Paul,

I'm writing this letter to inform you that we have decided to drop our Notice of Intent for the Rainbow Ridge Quarry. We don't feel it is necessary to pursue the development of this quarry area at this time.

We appreciate the work that has thus far been done by you and your office in this regard and apologize for any inconvenience this decision may cause you and your office.

We have opted to continue development of the "South Quarry Area" located with on the deeded mineral area at Clarks Basin. The South Quarry Area is a proven deposit and has demonstrated the ability to yield as many as four colors and three of these colors can be produced simultaneously.

We have discussed with Dave Morris and Larry Scrivanich the division of the various specific quarries, landing(s), and waste storage areas on the deeded portion for purposes of pertinent Plan Transfers, reclamation bonding etc. I'm in contact with Lynn Kunzler and will let him know when we will visit the sight to finalize the dividing up of the mineral area.

Thank you for your patience and help in this endeavor.

Sincerely,

William L Bown
